Education

Kumasi Technical University — Ghana
Bachelor of Technology in Computer Technology — *Jan. 2023 – Expected Oct. 2026*

Armed Forces Senior High School — Ghana
General Science — *Nov. 2019 – Sep. 2022*

Experience

Junior Software Engineer — June 2025 – Nov. 2025
Microlynxe Systems Ltd. — *Kumasi, Ghana*

- Developed and maintained company website features with React, React Router, and Bootstrap.
- Worked with developers and designers to deliver consistent, responsive user interfaces.

Vice President — Jan. 2025 – Jan. 2026
Amalitech Coding Club, KsTU — *Kumasi, Ghana*

- Helped grow club membership from 50 to 600+ through improved onboarding and member engagement.
- Coordinated weekly coding sessions for 50+ members and delivered practical, hands-on workshops.

Projects

FastShip | *FastAPI, React, PostgreSQL, Redis, Celery, Docker*

- Built a delivery management system for sellers and delivery partners to manage and track shipments.
- Implemented REST APIs, JWT session controls, asynchronous Celery tasks, and Docker Compose environments.

Lawya AI | *FastAPI, LangChain, ChromaDB, Hugging Face, Groq, React, TypeScript*

- Built a RAG assistant answering questions about Ghana's Constitution with retrieved passages and article citations.
- Indexed the Constitution PDF in ChromaDB with Hugging Face embeddings; served retrieval and Groq responses through FastAPI.

Audiophile E-commerce Store | *FastAPI, React, PostgreSQL, Redis*

- Built a full-stack store supporting product browsing, authentication, and order workflows.
- Designed REST APIs and PostgreSQL data access, with JWT-based authentication and session handling.

Kaime | *FastAPI, PostgreSQL, React, TypeScript, APScheduler*

- Built a platform for university staff to schedule email reminders for academic events, exams, and deadlines.
- Implemented idempotent notification delivery with APScheduler and PostgreSQL dispatch tracking.

Selected Certifications

Software Engineering: Python Levels 2–4: Applying, Building, and Advancing (O'Reilly, 2026); FastAPI & Backend Dev (O'Reilly, 2025); Advanced React (Scrimba); Data Structures & Algorithms (O'Reilly, 2025).

DevOps and AI/ML: GitHub Actions in 4 Hrs, YAML for DevOps, and Intro to Docker & Containers (O'Reilly, 2025–2026); AWS AI/ML Scholars '25 (Udacity); AWS Educate Machine Learning Foundations.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL (PostgreSQL), HTML/CSS
Frameworks: React, React Router, Next.js, FastAPI, Node.js, Tailwind CSS
Data and Libraries: PostgreSQL, Redis, SQLModel/SQLAlchemy, Pydantic, pandas, NumPy, Matplotlib
Tools: Git/GitHub, Docker, Vercel, Webpack, pgAdmin, VS Code, PyCharm, Google Colab
